Kitabda 1954-1959-cu illärdä respublikada yeni rähbärliyin formala?mas?, onun häyata keçirdiyi islahatlar, dövlät dili haqq?nda qanunun qäbul edilmäsi vä onun tätbiqu ilä ba?l? meydana ç?xan çätinliklär ähatä etmi?dir.

Ali and Nino, two lovers from vastly different backgrounds, grow up together in carefree innocence in Baku on the Caspian Sea. Here, where Eastern and Occidental collide, they are inevitably drawn into the events of the First World War and the Russian Revolution. Torn apart by the turmoil, Ali joins the defense of Azerbaijan from the onslaught of the Red Army, and Nino flees to the safety of Paris with their child, not knowing whether they will ever see each other again. A sweeping tale, as romantic and gripping as *Gone with the Wind* or *Dr. Zhivago*, it portrays, against a gloriously exotic backdrop, the enduring love between childhood friends divided by their separate cultures.

A number book like no other, introducing children to the significance of different numbers and the things they are associated with. Did you know that an octopus has 3 hearts, every snowflake has 6 points, giraffes have 7 bone in their necks, cloud cover is measure in 'oktas' from 0 to 8, and that 9 is lucky in China (but unlucky in Japan)? An unusual approach to a numbers book and a gorgeous and slightly eccentric illustration style will make this title stand out in a crowded retail environment. By the team who worked together on the acclaimed *My First 100 Words Book*, *Count to 100* and the award-winning *Big Book of Colours* (winner of the School Library Association's Under 7 Children's Choice Award 2016). An effortless and enjoyable way for children to learn about topics as diverse as fractions, counting, shapes, measuring, music, dates, animals, space, sports, geography and mythology through the magic of numbers.

A fun introduction to computer programming for kids Carol Vorderman takes kids' step-by-step through the basics of computer programming and how to work with code, the language of the future.Speaking to a global movement to teach children to code, this Python programming workbook breaks down key concepts into small, easy-to-understand parts. Your child is encouraged to practise copying code into the workbook so their new computer literacy sticks. A playful, hands-on approach that enhances other cognitive benefits such as skills in problem solving and abstract thinking.Computer Coding Made Easy is a great starting point for understanding code, learning how to program, and practicing computer language, for fun or for the future.

UNWTO Tourism Towards 2030 is a broad research project in continuation of UNWTO's work in the area of long-term forecasting initiated in the 1990s and aims at providing a global reference on tourism future development. Following the long-term forecast series of reports Tourism 2020 Vision, the Tourism Towards 2030 - Global Overview report updates international tourism projections through 2030. Central in the study are the projections for international tourism flows in the two decades 2010-2030, with as basis data series on international tourist arrivals as reported by destination countries for the period 1980-2010, taking into account subregion of destination, region of origin, mode of transport and purpose of visit.
