A cone is a three-dimensional solid that has a circular base. Its side “tapers upwards” as shown in the diagram, and ends in a single point called the vertex.. The radius of the cone is the radius of the circular base, and the height of the cone is the perpendicular distance from the base to the vertex.. Just like other shapes we met before, cones are everywhere around us: ice cream cones ...

The volume of the cylinder is: $\pi \times r^2 \times h = 2 \pi \times r^3$. The volume of the sphere is: $\frac{4}{3} \pi \times r^3$. So the sphere's volume is $\frac{4}{3}$ vs 2 for the cylinder. Or more simply the sphere's volume is $\frac{2}{3}$ of the cylinder's volume!

The Worst Vacation Ever! Thirteen-year-old Kyle thought spending a vacation on the Oregon coast with his family would be great. He'd never flown before, and he'd never seen the Pacific Ocean. One evening Kyle is left in charge of his younger sister, BeeBee, while his parents attend an adults-only Salesman of the Year dinner on an elegant yacht. Then the earthquake comes -- starting a fire in their hotel! As Kyle and BeeBee fight their way out through smoke and flame, Kyle remembers the sign at the beach that said after an earthquake everyone should go uphill and inland, as far from the ocean as possible. Giant tsunami waves -- three or four stories high can ride in from the sea and engulf anyone who doesn't escape fast enough. Kyle and BeeBee flee uphill as a tsunami crashes over the beach, the hotel, and the town. The giant wave charges straight up the hillside and through the woods where the children are running for their lives. The perfect vacation has become a nightmare! Somehow Kyle and BeeBee have to outwit nature's fury and save themselves from tsunami terror.
