from real-life entrepreneurs in brand new Meet the Entrepreneur video case studies - Exploration of the growing importance of social and civic enterprise and hot topics such as effectuation and lean entrepreneurship - Rich multimedia content in the form of additional teaching and learning resources on the companion website This market-leading book offers a truly global selection of case studies: - 97 cases from across Europe - 22 cases from the U.S. - 9 cases from Far Asia - 7 cases from the Middle East - 6 cases from Southern Asia - 6 cases from Australia

The rise of the female entrepreneur over the past 30 years is a cause for celebration in the UK. Whether driven by unfair treatment at work, conflict between office and family life, or the inspiration of a great business idea, hundreds of thousands of women are motivated to work for themselves. There are many benefits to being self employed but many, too, are the challenges. Women need confidence, support, and often some start-up finance to make a go of it. This book will provide inspiration, information and loads of advice from a range of women who run their own business. It starts by recognising that women start all kinds of ventures in many different circumstances: - Developing an idea from home - Freelancing - Joining the 'mumpreneurs' - Launching a business with capital investment - Buying a franchise or

Discover the foundations and main applications of telecommunications to smart grids In Smart Grid Telecommunications, renowned researchers and authors Drs. Alberto Sendin, Javier Matanza, and Ramon Ferrús deliver a focused treatment of the fundamentals and main applications of telecommunication technologies in smart grids. Aimed at engineers and professionals who work with power systems, the book explains what smart grids are and where telecommunications are needed to solve their various challenges. Power engineers will benefit from explanations of the main concepts of telecommunications and how they are applied to the different domains of a smart grid. Telecommunication engineers will gain an understanding of smart grid applications and services, and will learn from the explanations of how

Download Free Eg Solutions Plc

telecommunications need to be adapted to work with them. The authors aim to offer a simplified vision of smart grids with rigorous coverage of the latest advances in the field, while avoiding some of the technical complexities that can hinder understanding in this area. The book offers: Discussions of why telecommunications are necessary in smart grids and the various telecommunication services and systems relevant for them An exploration of foundational telecommunication concepts ranging from system-level aspects, such as network topologies, multi-layer architectures and protocol stacks, to communications channel transmission- and reception-level aspects covering modulations, bandwidth, multiple access, signal to noise ratio, interference, transmission media impairments, and more Examinations of telecommunication-related smart grids services and systems, including SCADA, protection and teleprotection, smart metering, substation and distribution automation, synchrophasors, Distributed Energy Resources, electric vehicles, microgrids, etc. A treatment of wireline and wireless telecommunication technologies, like DWDM, Ethernet, IP, MPLS, PONs, PLC, BPL, 3GPP cellular 4G and 5G technologies, Zigbee, Wi-SUN, LoRaWAN, Sigfox, etc., addressing their architectures, characteristics, and limitations Ideal for engineers working in power systems or telecommunications as network architects,

operations managers, planners, or in regulation-related activities, Smart Grid Telecommunications is also an invaluable resource for telecommunication network and Smart Grid architects.

This directory contains information on all the companies listed on the London & Irish Stock Exchanges. It also includes information on trustees, taxation, registrars, auditors, solicitors, overseas stock exchanges and more.

This book constitutes the thoroughly refereed proceedings of the 26th International Conference on Computer Networks, CN 2019, held in Gliwice, Poland, in June 2019. The 29 full papers presented were carefully reviewed and selected from 64 submissions. They are organized in topical sections on computer networks; communications; and queueing theory and queueing networks.
