Gian-Carlo Rota was born in Vigevano, Italy, in 1932. He died in Cambridge, Massachusetts, in 1999. He had several careers, most notably as a mathematician, but also as a philosopher and a consultant to the United

Online Library Gian Solutions

States government. His mathematical career was equally varied. His early mathematical studies were at Princeton (1950 to 1953) and Yale (1953 to 1956). In 1956, he completed his doctoral thesis under the direction of Jacob T. Schwartz. This thesis was published as the paper "Extension theory of differential operators I",

Online Library Gian Solutions

the first paper reprinted in this volume. Rota's early work was in analysis, more specifically, in operator theory, differential equations, ergodic theory, and probability theory. In the 1960's, Rota was motivated by problems in fluctuation theory to study some operator identities of Glen Baxter (see [7]).

Online Library Gian Solutions

Together with other problems in probability theory, this led Rota to study combinatorics.

His series of papers, "On the foundations of combinatorial theory", led to a fundamental re-evaluation of the subject. Later, in the 1990's, Rota returned to some of the problems in analysis and probability theory which motivated

Online Library Gian Solutions

his work in combinatorics. This was his intention all along, and his early death robbed mathematics of his unique perspective on linkages between the discrete and the continuous. Glimpses of his new research programs can be found in [2,3,6,9,10].

This three-volume set

Page 30/65

Online Library Gian Solutions

presents entries and primary sources that will impress on readers that what we do—or don't do—today regarding climate change will dramatically influence what life on this planet will be like for untold numbers of generations.

- Provides readers with a clearly written description of global-warming science and its

Online Library Gian Solutions

role in shaping a body of knowledge regarding a worldwide issue that affects everyone •

Suggests remedies for this serious problem, most notably a rapid rise in the implementation of wind power generation and a coming revolution in solar energy •

Impresses on readers that what Americans and the citizens and

Online Library Gian Solutions

governments of other nations around the globe do over the next decades will determine the future of this planet for many tens of thousands of years to come • Includes primary documents sourced from major scientific journals and from the many reports on recent climate change from

Online Library Gian Solutions

governmental organizations, including the Intergovernmental Panel on Climate Change (IPCC) and World Meteorological Organization (WMO), both part of the United Nations; and the U.S. government's National Climate Assessment

This book shows how the practice of script

Online Library Gian Solutions

writing can be used both as a pedagogical approach and as a research tool in mathematics education. It provides an opportunity for script-writers to articulate their mathematical arguments and/or their pedagogical approaches. It further provides researchers with a corpus of narratives that

Online Library Gian Solutions

can be analyzed using a variety of theoretical perspectives. Various chapters argue for the use of dialogical method and highlight its benefits and special features.

The chapters examine both “ low tech ” implementations as well as the use of a technological platform, LessonSketch. The chapters present results

Online Library Gian Solutions

of and insights from several recent studies, which utilized scripting in mathematics education research and practice.

In April of 1996 an array of mathematicians converged on Cambridge, Massachusetts, for the Rotafest and Umbral Calculus Workshop, two

Online Library Gian Solutions

con ferences celebrating Gian-Carlo Rota's 64th birthday. It seemed appropriate when feting one of the world's great combinatorialists to have the anniversary be a power of 2 rather than the more mundane 65. The over seventy-five par ticipants included Rota's doctoral students, coauthors, and other colleagues from more

Online Library Gian Solutions

than a dozen countries. As a further testament to the breadth and depth of his influence, the lectures ranged over a wide variety of topics from invariant theory to algebraic topology. This volume is a collection of articles written in Rota's honor. Some of them were presented at the Rotafest and Umbral Workshop while others

Online Library Gian Solutions

were written especially for this Festschrift. We will say a little about each paper and point out how they are connected with the mathematical contributions of Rota himself.

Multimedia surveillance systems is an emerging field that includes signal and image processing,

Online Library Gian Solutions

communications, and
computer vision.

Multimedia Video-
Based Surveillance
Systems: Requirements,
Issues and Solutions,
combines the most
recent research results
from these areas for use
by engineers and end-
users involved in the
design of surveillance
systems in the fields of
transportation and

Online Library Gian Solutions

services. The book covers emerging surveillance requirements, including new digital sensors for real-time acquisition of surveillance data, low-level image processing algorithms, and event detection methods. It also discusses problems related to knowledge representation in surveillance systems,

Online Library Gian Solutions

wireless and wired
multimedia networks,
and a new generation of
surveillance
communication tools.
Timely information is
presented on digital
watermarking,
broadband multimedia
transmission, legal use of
surveillance systems,
performance evaluation
criteria, and other new
and emerging topics,

Online Library Gian Solutions

along with applications
for transports and
pedestrian monitoring.

The information
contained in
Multimedia Video-
Based Surveillance
Systems: Requirements,
Issues and Solutions,
bridges the distance
between present
practice and research
findings, and the book is
an indispensable

Online Library Gian Solutions

reference tool for
professional engineers.

This book provides a comprehensive understanding on disaster resilient housing within the Vietnam context particularly and the developing world generally. The book has identified the root causes of housing vulnerability, restrictions

Online Library Gian Solutions

to safe housing
development, concepts
of disaster resilient
housing, key
issues/factors
implementers and
building designers need
to consider, and ways of
achieving resilient
housing outcomes in
actual design projects.
The design and
development of disaster
resilient housing has

Online Library Gian Solutions

been framed into three main themes: (i) community consultation, (ii) the role of built-environment professionals and (iii) design responses for resilience. To achieve these themes, there is a variety of contextual and intervening conditions that need to be addressed and met to provide an enabling

Online Library Gian Solutions

environment for promoting disaster resilient housing. These three themes are among the most arguable issues in recent debates and discussions, academically and practically, regarding disaster risk reduction and safe housing development. In addition, this book also provides the evidence-

Online Library Gian Solutions

based design framework for disaster resilient housing upon which design ideas and solutions for safe and resilient housing can be generated and shaped.

Framework agreements have arisen in response to the well documented and high costs of public procurement procedures. The

Online Library Gian Solutions

agreements have significant potential to improve procedural efficiency in public procurement, but are complex to operate.

Inadequate preparation and implementation can also frustrate their potential both to tackle waste, abuse and corruption and to enhance value for money. In this

Online Library Gian Solutions

enlightening book, Gian Luigi Albano and Caroline Nicholas look at the key decisions required for designing and using framework agreements and address both legal and economic issues to give the reader a clear understanding of the planning, variables and flexibility needed for efficient implementation. This

Online Library Gian Solutions

book will be of interest to policy makers, lawyers and public procurement practitioners who want to deepen their understanding of the legal and economic issues surrounding framework agreements.

"A critical translation of

the unabridged Italian text of Domenico Bernini's biography of his father, seventeenth-century sculptor, architect, painter, and playwright Gian Lorenzo Bernini (1598-1680). Includes commentary on the author's data and interpretations, contrasting them with other contemporary

Online Library Gian Solutions

primary sources and recent scholarship"--Provided by publisher.

This monograph deals with the existence of periodic motions of Lagrangian systems with n degrees of freedom $i, j + V'(q) = 0$, where V is a singular potential. A prototype of such a problem, even if it is not the only p

Online Library Gian Solutions

Physically interesting one, is the Kepler problem. q
 $0 < q < 1$. This, jointly with the more general N -body problem, has always been the object of a great deal of research.

Most of those results are based on perturbation methods, and make use of the specific features of the Kepler potential. Our approach is more on the lines of Nonlinear

Online Library Gian Solutions

rFunctional Analysis:our main purpose is to give a functional frame for system with singular potentials, including the Kepler and the N-body problem as particular cases.

Precisely we use Critical Point Theory to obtain existence results, qualitative in nature, which hold true for broad classes of potentials.

This highlights that the va

Online Library Gian Solutions

riational methods, which have been employed to obtain important advances in the study of regular Hamiltonian systems, can be successfully used to handle singular potentials as well. The research on this topic is still in evolution, and therefore the results we will present are not to be intended as the final ones. Indeed a major purpose of our discussion is to present

Online Library Gian Solutions

methods and tools which have been used in studying such problems. VIII
PREFACE Part of the material of this volume has been presented in a series of lectures given by the authors at SISSA, Trieste, whom we would like to thank for their hospitality and support. We wish also to thank Ugo Bessi,
Paolo Caldirola,
Fabio Giannoni,

Online Library Gian Solutions

tions. May26,1993
Notation n 1. For $x, y \in \mathbb{R}^n$, $\langle x, y \rangle$ denotes the Euclidean Scalar product, and $\|x\|$ the Euclidean norm. 2. $\text{meas}(A)$ denotes the Lebesgue measure of the subset A of \mathbb{R}^n - 3.

We denote by ST

Online Library Gian Solutions

$= [0, T] / \{a, T\}$ the unitary circle parametrized by $t \in [0, T]$.

We will also write $S^1 = \mathbb{R} / T\mathbb{Z}$.

We will write $S^n = \{x \in \mathbb{R}^n : |x| = 1\}$ and $\mathbb{R}^n = \mathbb{R}^n \setminus \{0\}$.

We denote by $L^p([0, T], \mathbb{R})$, $1 \leq p < +\infty$, the Lebesgue spaces, equipped with the standard norm $\|\cdot\|_p$.

$H^1(S^1, \mathbb{R})$ denotes the Sobolev space of $u \in$

Online Library Gian Solutions

$H,2(0, T; \mathbb{R})$ such that $u(0) = u(T)$. Thenormin H will be denoted by

$$\|u\|_2^2 = \|u\|_{\sim}^2 +$$

$\|u\|_{\sim}^2 \cdot 7$. We denote by (\cdot, \cdot) and $\|\cdot\|$ respectively the scalar product and the norm of the Hilbert space E .

8. For $u \in E$, E Hilbert or Banach space, we denote the ball of center u and radius r by

$$B(u, r) = \{v \in E : \|u - v\| \leq r\}.$$

We will also write $B =$

Online Library Gian Solutions

$B(O, r)$. $r \in \mathbb{R}$. We set

$A(n) = \{u \in H^1(\text{St}, n)\}$. k

10. For $V \in C^1(\mathbb{R}^n, \mathbb{R})$,

$\nabla V(t, x)$ we denote by $V'(t, x)$

the gradient of

V with respect to x . 11.

Given $f \in C^1(M, \mathbb{R})$,

M Hilbert manifold,

we let $r = \{u \in M : f(u) \sim$

$a\}$, $f^{-1}(a, b) = \{u \in M : a \sim$

$f(u) \sim b\}$. x

NOTATION 12. Given

$f \in C^1(M, \mathbb{R})$,

M Hilbert manifold,

Online Library Gian Solutions

we will denote by Z the set of critical points of f on M and by Z_c the set $Z \cap U_f^{-1}(c, c)$. 13.

Given a sequence $U_n \in E$, E Hilbert space, by $U_n \rightharpoonup u$ we

will mean that the sequence U_n converges weakly to u . 14. With $\mathcal{L}(E)$ we will denote the set of linear and continuous operators on E . 15. With $C^k(A, \mathbb{R})$ we will denote the set of fun
