As the G2 mini's name implies, the phone is significantly smaller than the LG G2. If you simply don't need its gigantic 5.2"

display, you can probably settle with the G2 mini's still-sizable 4.7" panel. At 540 x 960 pixels, though, the 234 ppi pixel density is by no means rivaling the level of clarity observed with today's 720p or 1080p displays.
