Pythagorean Theorem

A theorem that helps us find a missing side of a triangle; Pythagorean theorem, also known as Pythagoras' theorem. The theorem provides a fundamental relationship between the base, height, and hypotenuse of a triangle. It is given by the equation; $(\text{Hypotenuse})^2 = (\text{Base})^2 + (\text{Height})^2$ The hypotenuse is always the longest side of the triangle. After reading the problem, always start by creating a diagram.
