The examiner-reviewed P6 Practice and Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try to develop your application skills. Questions are grouped by topic so that you can easily identify what they cover. Detailed solutions provide tips, advise you how to approach questions and tell you how to gain easy marks. Examiner's comments tell you what the examiner is looking for in answers.

There is now almost universal acceptance that tax law is overly complex and indeterminate; and yet, there has to date been no comprehensive assessment of the role of the tax authority in the current arrangement. If the legislation and case law offer few immediate answers to the taxpayer, then the role of Her Majesty's Revenue & Customs (HMRC) in advising taxpayers becomes more apparent. This monograph contends that the provision of advice by HMRC is desirable by virtue of the rule of law and it follows that any such advice should be correct, clear, accessible and reliable. Additionally, there should exist some means of scrutinising the advice in order to check that it satisfies these criteria. Tax Authority Advice and the Public explores this view of HMRC's role in tax collection. It explains the deficiencies in the current system in this light, highlighting the pitfalls for taxpayers and practitioners as well as the potential remedies. Finally, the book assesses potential reforms which could be adopted in order to alleviate existing problems. A timely and ambitious work, this book is essential reading for practitioners and academics interested in the interaction between tax administration and public law.

50 years of fostering trade competitiveness around the globe generated a wealth of experience and expertise. ITC gained invaluable insights and learned many lessons in supporting SMEs in developing, least developed and transition economies to enhance their competitiveness and to internationalize. While ITC's mandate has remained unchanged over the last five decades, the trade landscape has altered radically and with it the manner in which ITC has delivered its trade-related technical assistance. The rise of a multi-polar global economy gave way to new trade, market and investment opportunities. A technological revolution transformed the way business is being transacted around the world. The multilateral, regional and bilateral trade regime matured and new governance patterns in international trade emerged in the form of supply chain trade.

In this volume charity commissioners and leading charity policy reformers from across the world reflect on the aims and objectives of charity regulation and what it has achieved. Regulating Charities represents an insider's review of the last quarter century of charity law policy and an insight for its future development. Charity Commissioners and nonprofit regulatory agency heads chart the nature of charity law reforms that they have implemented, with a 'warts and all' analysis. They are joined by influential sector reformers who assess the outcomes of their policy agitation. All reflect on the current state of charities in a fiscally restrained environment, often with conservative governments, and offer their views on productive regulatory paths available for the future. This topical collection brings together major charity regulation actors, and will be of great interest to anyone concerned with contemporary third sector policy-making, public administration and civil society.

Aflatoxins are a naturally occurring carcinogenic byproduct of common fungi on grains and other crops, particularly maize and groundnuts. They pose a significant public health risk in many tropical developing countries and are also a barrier to the growth of domestic and international commercial markets for food and feed. In recent years the aflatoxin problem has garnered greatly increased attention from both policy and donor communities around the globe. What can be done to reduce the detrimental impacts of aflatoxins? Because growth of the molds that produce aflatoxins is caused by multiple factors, and because they must be controlled along the entire value chain from production to consumption, only a robust multifaceted approach to controlling aflatoxins is likely to be effective. The nineteen briefs in this set thus provide different perspectives on aflatoxin risks and solutions. The analyses fall under four broad themes: (1) what is known about the health risks from aflatoxins; (2) how to overcome market constraints to improved aflatoxin control by building new market channels and incentives; (3) what is the international policy context for taking action in developing countries; and (4) what is the state of research on new aflatoxin control technologies, including new methods for aflatoxin detection, crop breeding, biological control, food storage and handling, and postharvest mitigation. These briefs collectively provide a much clearer picture of the state of current efforts at combatting aflatoxins. They also identify what gaps loom particularly large—including the need for contry-specific risk analysis and for testing integrated solutions for the entire supply chain—in our global efforts to effectively reduce human exposure to aflatoxins and increase the economic returns to smallholders in agriculture.

This 2013 Global Food Policy Report is the third in an annual series that provides an in-depth look at major food policy developments and events. Initiated in response to resurgent interest in food and nutrition security, the series offers a yearly overview of the food policy developments that have contributed to or hindered progress in achieving food and nutrition security. It reviews what happened in food policy and why, examines key challenges and opportunities, shares new evidence and knowledge, and highlights emerging issues.

The most important book yet from the author of the international bestseller The Shock Doctrine, a brilliant explanation of why the climate crisis challenges us to abandon the core "free market" ideology of our time, restructure the global economy, and remake our political systems. In short, either we embrace radical change ourselves or radical changes will be visited upon our physical world. The status quo is no longer an option. In This Changes Everything Naomi Klein argues that climate change isn't just another issue to be neatly filed between taxes and health care. It's an alarm that calls us to fix an economic system that is already failing us in many ways. Klein meticulously builds the case for how massively reducing our greenhouse emissions is our best chance to simultaneously reduce gaping inequalities, re-imagine our broken democracies, and rebuild our gutted local economies. She exposes the ideological desperation of the climate-change deniers, the messianic delusions of the would-be geoengineers, and the tragic defeatism of too many mainstream green initiatives. And she demonstrates precisely why the market has not—and cannot—fix the climate crisis but will instead make things worse, with ever more extreme and ecologically damaging extraction methods, accompanied by rampant disaster capitalism. Klein argues that the changes to our relationship with nature and one another that are required to respond to the climate crisis humanely should not be viewed as grim penance, but rather as a kind of gift—a catalyst to transform broken economic and cultural priorities and to heal long-festering historical wounds. And she documents the inspiring movements that have already begun this process: communities that are not just refusing to be sites of further fossil fuel extraction but are building the next, regeneration-based economies right now. Can we pull off these changes in time? Nothing is certain. Nothing except that climate change changes everything. And for a very brief time, the nature of that change is still up to us.

This revelatory history of the elusive National Security Council shows how staffers operating in the shadows have driven foreign policy clandestinely for decades. When Michael Flynn resigned in disgrace as the Trump administration's national security advisor the New York Times referred to the National Security Council as "the traditional center of management for a president's dealings with an uncertain world." Indeed, no institution or individual in the last seventy years has exerted more influence on the Oval Office or on the nation's wars than the NSC, yet until the explosive Trump presidency, few Americans could even name a member. With key analysis, John Gans traces the NSC's rise from a collection of administrative clerks in 1947 to what one recent commander-in-chief called the president's "personal band of warriors." A former Obama administration speechwriter, Gans weaves extensive archival research with dozens of news-making interviews to reveal the NSC's unmatched power, which has resulted in an escalation of the hawkishness and polarization, both in Washington and the nation at large.

As the world's most dynamic region, Asia embodies explosive economic growth, diverse political systems, vibrant societies, modernizing militaries, cutting-edge technologies, rich cultural traditions amid globalization, and strategic competition among major powers. As a result, international relations in Asia are evolving rapidly. In this fully updated and expanded volume, leading scholars from Asia, Europe, and North America offer the most current and definitive analysis available of Asia's regional relationships. They set developments in Asia in theoretical context, assess the role of leading external and regional powers, and consider the importance of subregional actors and linkages. Combining interpretive richness and factual depth, their essays provide an authoritative and stimulating overview. Students of contemporary Asian affairs—new to the field and

old hands alike—will find this book an invaluable read. Contributions by: Amitav Acharya, Sebastian Bersick, Nayan Chanda, Ralph A. Cossa, Michael Green, Samuel S. Kim, Edward J. Lincoln, Martha Brill Olcott, T.V. Paul, Phillip C. Saunders, David Shambaugh, Sheldon W. Simon, Scott Snyder, Robert Sutter, Hugh White, and Michael Yahuda
