~~Saturated and Unsaturated Solutions | Class 6th Chemistry ...~~

A solution is said to be saturated which cannot dissolve any more of the substance that is mixed into it. So, when a saturated solution is kept in contact with any extra amount of solute it will not get dissolved. A solution is said to be unsaturated in which all the solute dissolves into the solvent and the solvent can be either liquid or gas.

~~saturated...~~

A saturated solution basically implies that all the solvent has been dissolved with the solute, such that if more solute is added, it would not dissolve; this is called a saturated solution. An unsaturated solution basically means that if you add more solute, it can and will still dissolve in the solvent until it reaches saturation.
